

pounds of skim remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse directions by a like amount; and

(iv) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class I that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount beginning with the nearest plant at which Class I utilization is available;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1050.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to paragraph (a)(14) of this section and the corresponding step of paragraph (b) of this section.

§ 1050.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1050.44(a)(12) and the corresponding step of § 1050.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1050.43(d) and § 1050.44 on the basis of such report, (including any reclassification of inventories of bulk concentrated fluid milk products), and thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operation a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 12th day after the end of each month, report to each cooperative association which so requests, the class utilization of producer milk received by each handler from a cooperative association or from members of the association. For the purpose of this report, the milk caused to be so delivered by an association shall be prorated to each class in the proportion that the total receipts of milk received

Agricultural Marketing Service, USDA

§ 1050.51

from producers by such handler were used in each class.

CLASS PRICES

§ 1050.50 Class prices.

Subject to the provisions of § 1050.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus \$1.61.

(b) *Class II price.* The Class II price shall be the basic formula price for the second preceding month plus \$0.30.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

[39 FR 15448, May 3, 1974, as amended at 46 FR 43381, Aug. 28, 1981; 51 FR 12832, Apr. 16, 1986; 60 FR 6610, Feb. 2, 1995]

§ 1050.51 Basic formula price.

The basic formula price shall be the preceding month's average pay price for manufacturing grade milk in Minnesota and Wisconsin using the "base month" series, as reported by the Department, adjusted to a 3.5 percent butterfat basis using the butterfat differential for the preceding month computed pursuant to § 1050.74 and rounded to the nearest cent, plus or minus the change in gross value yielded by the butter-nonfat dry milk and Cheddar cheese product price formula computed pursuant to paragraphs (a) through (e) of this section.

(a) The gross values of per hundredweight of milk used to manufacture butter-nonfat dry milk and Cheddar cheese shall be computed, using price data determined pursuant to paragraph (b) of this section and annual yield factors, for the preceding month and separately for the current month as follows:

(1) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the Grade AA butter price by 4.27;

(ii) Multiply the nonfat dry milk price by 8.07; and

(iii) Multiply the dry buttermilk price by 0.42.

(2) The gross value of milk used to manufacture Cheddar cheese shall be the sum of the following computations:

(i) Multiply the Cheddar cheese price by 9.87; and

(ii) Multiply the Grade A butter price by 0.238.

(b) The following product prices shall be used pursuant to paragraph (a) of this section:

(1) *Grade AA butter price.* Grade AA butter price means the simple average for the month of the Chicago Mercantile Exchange, Grade AA butter price, as reported by the Department.

(2) *Nonfat dry milk price.* Nonfat dry milk price means the simple average for the month of the Western Nonfat Dry Milk Low/Medium Heat price, as reported by the Department.

(3) *Dry buttermilk price.* Dry buttermilk price means the simple average for the month of the Western Dry Buttermilk price, as reported by the Department.

(4) *Cheddar cheese price.* Cheddar cheese price means the simple average for the month of the National Cheese Exchange 40-pound block Cheddar cheese price, as reported by the Department.

(5) *Grade A butter price.* Grade A butter price means the simple average for the month of the Chicago Mercantile Exchange Grade A butter price, as reported by the Department.

(c) Determine the amounts by which the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk and the gross value per hundredweight of milk used to manufacture Cheddar cheese for the current month exceed or are less than the respective gross values for the preceding month.

(d) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (c) of this section by determining the relative proportion that the data included in each of the following paragraphs is of the total of the data represented in paragraphs (d)(1) and (d)(2) of this section:
